Baritone Saxophone Bartok-pizzicato indications above noteheads indicate slap tongues.

Electric Guitar The electric guitar should be treated with 6 different colors, via effects pedal(s). The color to be used is indicated at the beginning of each section of the score. Pedal colors may include any combination of distortion, reverb or short delay (less than a quarter second). A volume pedal should be placed last in the effect chain, to control overall dynamic.

Piano Cross-shaped noteheads indicate glissandi on the tops of the keys, without depressing the keys, played with the flesh of the fingers, or fingernails. A flat or natural sign above the glissandi determines whether to play on the black or white keys.

Percussion Instrumentation is somewhat up to the discretion of the performer, but should obey the following guidelines:

- *4 wooden shakers*, bamboo wind-chimes, maracas, rainsticks, cabasa, caxixi etc. These could include metal timbres, but should be primarily wood. The order of the shakers is not important. Instruments with a longer decay, and a more granular sound quality, such as rainsticks and bamboo windchimes are preferred.
- *5 wood blocks*, arranged from lowest to highest. The exact pitch is not important. These could also be temple blocks. The sound quality should be very dry.
- *3 large drums*, including at least one proper bass drum, arranged from lowest to highest.

Percussion should be performed with bare hands. Wooden rings may be worn to increase the overall dynamic, especially on the wood blocks. Styrofoam blocks should be placed on the bass drums, to be used during the rehearsal marks indicated in the score (4, 14, 17a, 17b). Grace notes should always be played with the hands.
